Double Capacity
Save time & energy

Articulating Conveyor for Performer

Double capacity at the door

Moving up and down — and from left to right — EXPRESS Snoot optimizes the workflow. No time is wasted, as parcels are eased onto the conveyor belt with short, ergonomic movements. Economy of movement, with the conveyor in immediate reach, means loading and unloading is both more efficient and less tiring.

Optimize flexibility and cut transport costs

EXPRESS Snoot reaches every inch with ease, so vehicles can be filled to the brim — reducing transport costs. When the fleet includes vans, EXPRESS Snoot can be lowered below floor level. This flexibility means vehicles of ANY size can be served through standard doors.

Hands-free, nudge operation

Unique nudge buttons are used to operate the conveyor, so the operator is able to use both hands to move parcels. Working intuitively the operator just pulls the EXPRESS Snoot over to where it should be and nudges the unit into place with a hip, shoulder, knee or elbow.

Work efficiently within the Power Zone

No need to move between conveyor and cargo, as EXPRESS Snoot is right alongside the operator. Working consistently within the Power Zone, i.e. between the knee and shoulder, the effort required to load and unload is reduced significantly.

Handling loose-loaded cargo with ease
