

Classic Conveyor

Most sold telescopic conveyor worldwide

Reduce time & increase capacity

Reduce (un)loading time by 50% and increase capacity at the door.

Long Extendibility

Components' durability and design ensures strength and structural load performance.

High throughput

(Un)loading from 800 to 1000 parcels per hour, depending on the operator.

Improve work environment

Minimal lifting needed as height and elevation can be adjusted.

Multiple package types

Transfers loose-loaded boxes, bubble envelopes, paperbags and polybags.

Built with safety in mind

Standard safety features ensure a secure and productive workplace.

Increase the ROI in short time

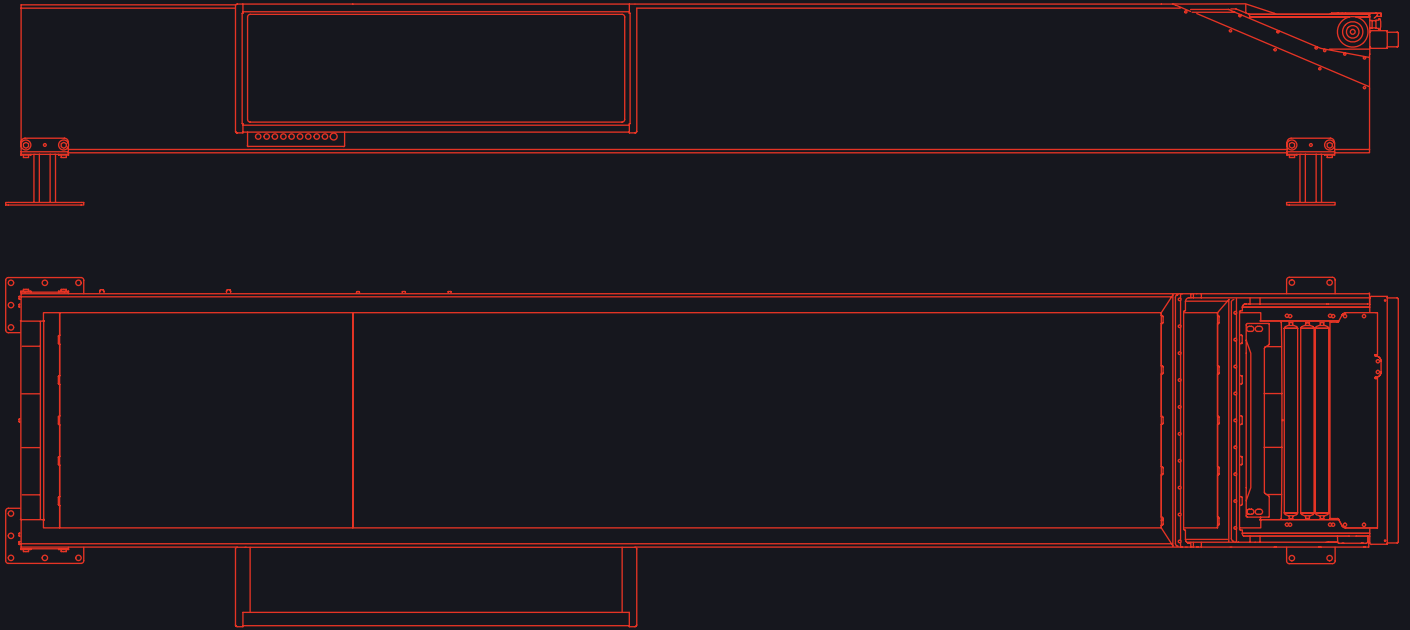

Experience short ROI with efficiency improvements and reduced operational costs.

Built to last

Every single Caljan Classic Telescopic Conveyor has a 5-year structural warranty.

(Un)load trailers & trucks of any size twice as fast as manual handling

Load or empty loose-loaded goods in just half the time with the aid of a Caljan Classic telescopic conveyor. Typically the Telescopic Conveyor is used to load and/or unload boxes, sacks, tires etc. All Caljan Telescopic Conveyors become an extension of your workforce, cutting trailer loading & unloading times in half. With ergonomic operation, it works hard so your employees don't have to. You save both time and money. Every single Caljan Telescopic Conveyor is covered by a 5-year structural warranty. Proven durability and trusted by organizations worldwide for several decades.

Unmatched durability

Constructed from high-quality micro steel alloy, the conveyor frame is engineered to endure the demanding conditions prevalent in loading and unloading areas, ensuring precise operation and consistent high performance throughout the equipment's service life. All moving components are safeguarded in accordance with the most recent safety standards.

Fully customizable

The Classic product line represents our standard offering, characterized by proven quality and durability. Caljan has refined and perfected the Classic telescopic conveyor to be customizable to meet your specific requirements, allowing for the addition of one or more functional options.

Built with safety in mind

Classic conveyor can be used to (un)load all vehicle types. The Telescopic Conveyor is suitable for applications with or without a leveller and dock housing. The machine is fully guarded on the underside for optimal safety. The smallest Telescopic Conveyor has a nested length of 2.3 m and the largest a nested length of 8 m. The longest Telescopic Conveyor has a reach of 16 m.

"In addition to improving working conditions, our Caljan Classic Telescopic Conveyors make the loading process much faster."
